§1101.26

shall notify the manufacturer or private labeler that it intends to disclose the information not less than 10 working days after the date of the receipt of notification by the firm. The notice of intent to disclose will include an explanation of the reason for the Commission's decision, copies of any additional materials, such as explanatory statements and letters to Freedom of Information Act requesters, which were not previously sent to the firm.

(b) Commission finding a lesser period is required. The Commission may determine that the public health and safety requires less than 10 working days advance notice of its intent to disclose information claimed to be inaccurate. For example, the Commission may determine it is necessary to warn the public quickly because individuals may be in danger from a product hazard or a potential hazard, or to correct product safety information released by third persons, which mischaracterized statements made by the Commission about the product or which attributes to the Commission statements about the product which the Commission did not make.

(c) Notice of findings. The Commission will inform a manufacturer or private labeler of a product which is the subject of a public health and safety finding that the public health and safety requires less than 10 days advance notice either orally or in writing, depending on the immediacy of the need for quick action; and the Commission will publish the finding in the FEDERAL REGISTER. Firms will be notified in advance of the date and time, if possible, at which the Commission intends to disclose the information. Disclosure may be concurrently with the filing of the FEDERAL REGISTER notice and need not await its publication. The FEDERAL REGISTER notice prepared under section 6(b)(2) may be submitted simultaneously with or after a FEDERAL REG-ISTER notice prepared under section 6(b)(1) (see § 1101.23(c)).

§ 1101.26 Circumstances when the Commission does not provide notice and opportunity to comment.

(a) Notice to the extent practicable. Section $\theta(b)(1)$ requires that "to the extent practicable" the Commission must pro-

vide manufacturers and private labelers notice and opportunity to comment before disclosing information from which the public can ascertain readily their identity.

- (b) Circumstances when notice and opportunity to comment is not practicable. The Commission has determined that there are various circumstances when notice and opportunity to comment is not practicable. Examples include the following:
- (1) When the Commission has taken reasonable steps to assure that the company to which the information pertains is out of business and has no identifiable successor.
- (2) When the information is disclosed in testimony in response to an order of the court during litigation to which the Commission is not a party.

Subpart D—Reasonable Steps Commission Will Take To Assure Information It Discloses Is Accurate, and That Disclosure Is Fair in the Circumstances and Reasonably Related to Effectuating the Purposes of the Acts it Administers

§1101.31 General requirements.

- (a) Timing of decisions. The Commission will attempt to make its decision on disclosure so that it can disclose information in accordance with section 6(b) as soon as is reasonably possible after expiration of the statutory thirty day moratorium on disclosure.
- (b) Inclusion of comments. In disclosing any information under this section, the Commission will include any comments or other information submitted by the manufacturer or private labeler unless the manufacturer or private labeler at the time it submits its section 6(b) comments specifically requests the Commission not to include the comments or to include only a designated portion of the comments and disclosure of the comments on such a designated portion is not necessary to assure that the disclosure of the information which is the subject of the comments is fair in the circumstances.

- (c) Explanatory statements. Where appropriate, the Commission will accompany the disclosure of information subject to this subpart with an explanatory statement that makes the nature of the information disclosed clear to the public. Inclusion of an explanatory statement is in addition to, and not a substitute for, taking reasonable steps to assure the accuracy of information. To the extent it is practical the Commission will also accompany the disclosure with any other relevant information in its possession that places the released information in context.
- (d) Information previously disclosed. If the Commission has previously disclosed, in accordance with section 6(b)(1), the identical information it intends to disclose again in the same format, it will not customarily take any additional steps to assure accuracy unless the Commission has some reason to question its accuracy or unless the firm, in its comments responding to the Commission's initial section 6(b) notice, specifically requests the opportunity to comment on subsequent disclosures, or unless the Commission determines that sufficient time has passed to warrant seeking section 6(b) comment again. Before disclosing the information the Commission will again review the information to see if accuracy is called into question and will further look to whether disclosure is fair in the circumstances and reasonably related to effectuating the purposes of the Acts the Commission administers.

§1101.32 Reasonable steps to assure information is accurate.

- (a) The Commission considers that the following types of actions are reasonable steps to assure the accuracy of information it proposes to release to the public:
- (1) The Commission staff or a qualified person or entity outside the Commission (e.g., someone with requisite training or experience, such as a fire marshal, a fire investigator, an electrical engineer, or an attending physician) conducts an investigation or an inspection which yields or corroborates the product information to be disclosed; or

- (2) The Commission staff conducts a technical, scientific, or other evaluation which yields or corroborates the product information to be disclosed or the staff obtains a copy of such an evaluation conducted by a qualified person or entity; or
- (3) The Commission staff provides the information to be disclosed to the person who submitted it to the Commission for review and, if necessary, correction, and the submitter confirms the information as accurate to the best of the submitter's knowledge and belief, provided that:
- (i) The confirmation is made by the person injured or nearly injured in an incident involving the product; or
- (ii) The confirmation is made by a person who, on the basis of his or her own observation or experience, identifies an alleged safety-related defect in or problem with such a product even though no incident or injury associated with the defect or problem may have occurred; or
- (iii) The confirmation is made by an eyewitness to an injury or safety-related incident involving such a product; or
- (iv) The confirmation is made by an individual with requisite training or experience who has investigated and/or determined the cause of deaths, injuries or safety-related incidents involving such a product. Such persons would include, for example, a fire marshal, a fire investigator, an electrical engineer, an ambulance attendant, or an attending physician; or
- (v) The confirmation is made by a parent or guardian of a child involved in an incident involving such a product, or by a person to whom a child is entrusted on a temporary basis.
- (b) The steps set forth below are the steps the Commission will take to analyze the accuracy of information which it proposes to release to the public.
- (1) The Commission will review each proposed disclosure of information which is susceptible of factual verification to assure that reasonable steps have been taken to assure accuracy in accordance with §1101.32(a).
- (2) As described in subpart C, the Commission will provide a manufacturer or private labeler with a summary or text of the information the
